INTRODUCTION

This 1981 issue of Fire Losses in Ontario continues the new format introduced in the combined 1979 & 80 book.

With the new format, the category "firefighters" has been included in the fire casualty listing, and fire incidents Russell

The county listings are listed under the new numerical code which replaces the Alpha code of previous years.

The reason for this change, which was introduced in the last issue, is that it enables us to retrieve information much faster and easier.

This system is based on the Federal Government code which utilizes seven digits. However, only four digits are needed for coding purposes in this publication.

The first two digits inidcate the County, Regional Municipality, and District. The last two digits represent the incorporated municipality.

For example "20" is the code for Metropolitan Toronto and "04" is the code for the City of Toronto. Discrepancies in section totals in this publication are due to a variance in the time periods of computer runs.

We hope you will appreciate that this edition brings you up-to-date on important statistics for 1981, while work is underway on the 1982 edition which will contain major changes designed to give you a wealth of information.

The 1982 edition promises to contain many new pertinent categories in a format which should produce expanded information in a more comprehensible context.

In this edition, a number of categories which appeared in previous years have been eliminated due to redundancy, non relevance or failure of compliance with the new computer processing system.
